

CASTLE

You will need:

- 10 cm x 20 cm cardboard box
- 2 yoghurt pots
- scissors
- 2 cardboard tubes
- sticky tape
- string
- paints
- paintbrushes

- 1** Cut a pattern around the top of the box and the yoghurt pots.

- 2** Cut two slits in the tubes and slot them over two corners of the box.

TOP TIP

Paint your models white first. This will make the colours you paint on top much brighter.

- 3** Stick the yoghurt pots to the tops of the tubes with sticky tape.

- 4** Cut out a drawbridge in the wall of the castle. Make small holes and thread two bits of string through the drawbridge and the back of the castle. Pull the strings and up it comes!

- 5** First paint the castle white. When the white paint is dry, paint it in the colours you choose. Then, paint the windows and the drawbridge.
