Nettleham Church of England

(Voluntary Aided) Junior School

Curriculum

Our School Vision

As a Christian school we believe that every member of our community should feel wonderful, amazing, loved, valued and unique, because God made us that way. We encourage all our children to achieve the highest possible standards and develop skills to be lifelong learners. Our school values are: Trust, Humility, Thankfulness, Koinonia, Friendship and Endurance.

Our Curriculum Vision

Our curriculum is rooted in our school's Christian identity and reflects our values and vision. Thorough academic learning is balanced and enriched by a wide variety of creative, sporting and musical experiences. We aspire to give all our pupils the opportunities, skills and knowledge to have the best possible chance in life.

Rationale

<u>Intent</u>

The Church family is at the heart of our curriculum and our curriculum is taught in such a way as to reflect our values and vision. Our curriculum is based on the principles of balance, coherence and relevance. The curriculum is infused with a well thought-out variety of academic challenges balanced with an array of creative, musical and sporting enrichment opportunities whilst also nurturing personal development. Spiritual, moral, social, cultural development, along with physical and mental wellbeing, underpins all our work. These elements have been carefully considered in designing a broad, balanced and ambitious curriculum for all, which gives children the knowledge to succeed and the skills to become lifelong learners, whichever path they take. We have an aspiration for our children to be successful, independent, resilient, proactive learners, well rounded, passionate pupils so they develop the skills, knowledge and understanding that will set them in good stead for future learning and to give them the best possible chance in life. This is provided in a safe atmosphere of mutual trust, respect and support. We strive to be an inspiring learning community for all which reflect the school and village locality, heritage and community.

Implementation

Pupils learn best when they are happy, confident and interested. They are supported and challenged by staff through a variety of teaching methods to make connections between different subjects and link this to their own life experiences and prior knowledge. In this way knowledge is retained and learning becomes secure and embedded. Misconceptions are closely monitored and children receive effective and timely feedback. Children are encouraged to take responsibility for their own learning and identify their own mistakes, rectifying them where possible and appropriate.

Staff have excellent subject knowledge, which is constantly being developed, and they use this effectively to motivate all children. They ensure that the learning environment is attractive, stimulating and conducive to the development of knowledge, skills and concepts.

The curriculum is thoroughly enriched with a broad range and variety of trips, visitors and engaging experiences both within lessons, throughout the day and extra-curricular activities to enhance pupil provision. Pupils are regularly encouraged to explore their creativity and imagination through diverse music, sports and art projects and experiences.

Formative and summative assessment are regularly used to inform teacher judgements of attainment and progress allowing staff to identify any gaps and provide suitable levels of intervention, support and challenge. Results are tracked and monitored through our own assessment system and then analysed by subject leaders and senior leaders. All subjects have clearly mapped out skills and knowledge progressions, so prior knowledge is effectively built upon. Marking and feedback is used effectively to further learning, set targets, praise, inform planning, correct misunderstanding, assess, recognise success and showing children next steps to improve through reflecting on comments and personal goal setting. The whole school family work hard to motivate and inspire our pupils to prepare them for the world they live in today and for life.

Impact

As a result of our broad and rich curriculum, pupils develop detailed knowledge and skills across a range of subjects, recalling and retaining facts and ideas appropriately, and, as a result, achieve well. Where relevant, this is reflected in national test results, where children meet government age related expectations. All pupils read competently and fluently to gain knowledge, understanding and for pleasure. Pupils are given the necessary skills and values to be ready for both the next stage of their education and for their future lives in the wider world. We instil all our pupils with good morals and values to enable them to become tolerant and compassionate individuals.

The effectiveness of our curriculum design is regularly monitored and evaluated by leaders, and adjusted if necessary to ensure the best possible outcomes for all our pupils.
