

## The Continent of Asia

Now we have revised the 7 continents of the world, we would like you to focus on one of these continents - Asia.

For this task, we would like you to use the '**World Geography Scavenger Hunt Map**' (located in our *Geography* folder on our website) and attempt to label the seas and oceans, the rivers, the mountains and the countries, all within and around the continent of Asia.

To do this you can use the internet or an atlas and to give you a head start, we have provided you with a map (see below) that provides you with some (not all!) of the geographical detail you will need.

Enjoy your hunting for geography & enjoy learning about the part of the world that contains our country of focus.....**India**.

## Fascinating Facts about Asia - Crossword Task.

You can now use your geographical knowledge to complete our crossword.
