The fact we need to remember today: How many grams are in a kilogram?

## L.O. To convert grams to kilograms

 and vice versa.- To convert kilograms to grams, we multiply by 1000 .
- To convert grams to kilograms, we divide by 1000 .

The only tricky part is to know when to multiply and when to divide by 1000 !

> These phrases might help you to remember what to do when!

- Changing Units *here are 2 ways to change units mulfply a divide * Remember this

Best Soccer Mom Silly Babies Dancing

- To convert: kilograms to grams
- Think: $\underline{B}$ G unit to SMALL unit

Remember:

## Best Soccer Mum

- So we MULTIPLY by 1000
- To convert: grams to kilograms
- Think: $\underline{\text { SMALL unit to }}$ BIG unit

Remember:

## Silly <br> Babies <br> Dancing

- So we DIVIDE by 1000

## Who can remember how to multiply by 10 ?

- Move all the digits one place to the left, and add a zero as a placeholder.

| TH | H | T | U |
| :--- | :--- | :--- | :--- |
|  |  | 6 | 2 |
|  | 6 | 2 | 0 |

$$
62 \times 10=620
$$

# Who can remember how to multiply by 100 ? 

- Move all the digits two places to the left, and add zeroes as placeholders.

| TH | H | T | U |
| :--- | :--- | :--- | :--- |
|  |  | 3 | 8 |
| 3 | 8 | 0 | 0 |

$38 \times 100=3800$

## Use your brains Year 5!

- So to multiply by 10 you move everything one space to the left,
- And to multiply by 100 you move everything two spaces to the left..
- What do you think you do to multiply by 1000?

## To convert kilograms to grams, multiply by 1000 .

- (kg to g - big to small - best soccer Mum - multiply)
- Move all the digits three places to the left, and add zeroes as placeholders.

| TH | H | T | U |
| :--- | :--- | :--- | :--- |
|  |  |  | 9 |
| 9 | 0 | 0 | 0 |
| $9 \mathrm{~kg} \times 1000=9000 \mathrm{~g}$ |  |  |  |

## To convert kilograms to grams, multiply by 1000 .

- Move all the digits three places to the left, and add zeroes as placeholders.

| Hth | Tth | Th | H | $T$ | $U$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  | 1 | 7 |
|  | 1 | 7 | 0 | 0 | 0 |

$17 \mathrm{~kg} \times 1000=17,000 \mathrm{~g}$

## To convert kilograms to grams, multiply by 1000 .

- Move all the digits three places to the left, and add zeroes as placeholders.

| Hth | Tth | Th | H | T | U |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  | 1 | 2 | 8 |
| 1 | 2 | 8 | 0 | 0 | 0 |

$$
128 \mathrm{~kg} \times 1000=128,000 \mathrm{~g}
$$

## To convert grams to kilograms, simply do it the other way.

- (Small to big - silly babies Dancing - divide)
- Move all the digits three places to the right and see what you're left with.

| Hth | Tth | Th | H | T | U |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  | 6 | 0 | 0 | 0 |
|  |  |  |  |  | 6 |

$6000 \mathrm{~g} \div 1000=6 \mathrm{~kg}$

## To convert grams to kilograms, divide by 1000 .

- (Small to big - silly babies Dancing - divide)
- Move all the digits three places to the right and see what you're left with.

| Hth | Tth | Th | H | T | $U$ |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | 5 | 8 | 0 | 0 | 0 |
|  |  |  |  | 5 | 8 |
| $58,000 \mathrm{~g} \div 1000=58 \mathrm{~kg}$ |  |  |  |  |  |

## To convert grams to kilograms, divide by 1000 .

- (Small to big - silly babies Dancing - divide)
- Move all the digits three places to the right and see what you're left with.

| Hth | Tth | Th | H | T | U |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 2 | 3 | 0 | 0 | 0 |
|  |  |  | 1 | 2 | 3 |

$$
123,000 \mathrm{~g} \div 1000=123 \mathrm{~kg}
$$

# Convert 1.5 kg to grams... Hang on! This one's got a decimal. 

- Big to small - best soccer mum - multiply. Do the same thing. Just don't move the decimal point!

|  | Th | H | T | U | $\bullet$ Tenths |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  | 1 | $\bullet 5$ |
|  | 1 | 5 | 0 | 0 | $\bullet 0$ |

$1.5 \mathrm{~kg} \times 1000=1500 \mathrm{~kg}$

## Convert 14.3 kg to grams.

- Big to small - best soccer mum - multiply. Just don't move the decimal point!

|  | Th | H | T | U | © Tenths |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  | 1 | 4 | 03 |
| 1 | 4 | 3 | 0 | 0 | 0 |

$$
14.3 \mathrm{~kg} \times 1000=14,300 \mathrm{~kg}
$$

## Convert 1900 g to kilograms.

- small to big - silly babies dancing - divide. Just don't move the decimal point!

|  | Th | $H$ | T | U | $\bullet$ Tenths |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | 1 | 9 | 0 | 0 | $\bullet 0$ |
|  |  |  |  | 1 | $\bullet 9$ |

$1900 \mathrm{~g} \div 1000=1.9 \mathrm{~kg}$
